Work Experience

November 2021 - March 2023

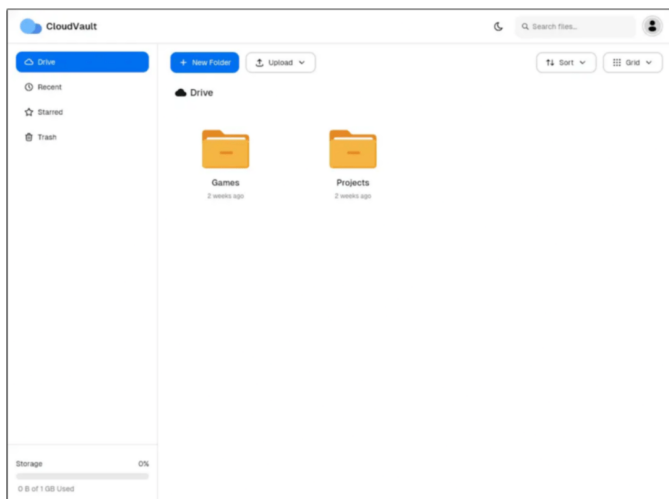

Full Stack Developer (Freelance), Tutpro

Spearheaded the creation of a cross-platform Android and web application utilizing Flutter framework, unifying user experiences across multiple platforms while reducing development overhead by maintaining a single codebase.

Engineered and implemented high-performance backend systems with Nest.js, integrating GraphQL API to streamline data retrieval and manipulation, resulting in enhanced system responsiveness and adaptability.

Orchestrated the containerization of Nest.js backend using Docker technology, facilitating seamless deployment on Digital Ocean infrastructure, thus ensuring scalable and reliable service delivery.

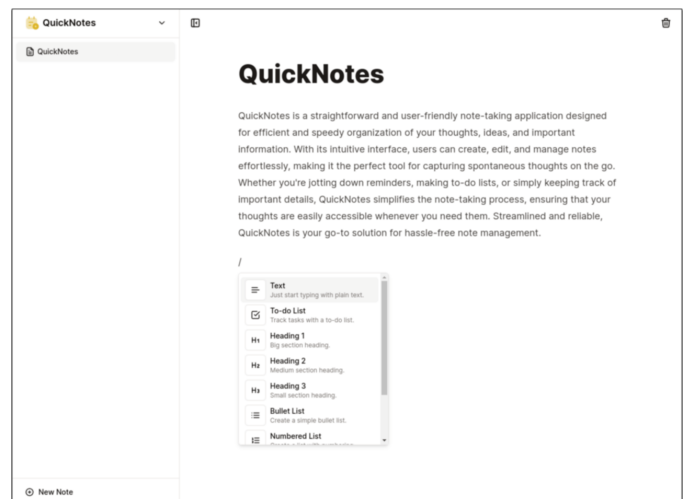

Projects

CloudVault

A web based cloud storage platform build in React.

<https://github.com/premkumar5012002/cloud-vault>

QuickNotes

A simple web-based notes app for your note taking needs.

<https://github.com/premkumar5012002/quick-notes>

Education

2019 - 2023

Bharath University

Computer Science

CGPA : 8.4

Skills

Programming Languages

- JavaScript
- TypeScript
- Dart
- SQL

Technologies

- React
- Next.js
- NestJs
- Node.js
- Flutter
- Express
- Tailwind CSS
- GraphQL

Databases & Tools

- PostgreSQL
- Redis
- Git
- Docker
- Terraform
